#### 4. PROJECT DESCRIPTION

The project is an interior renovation of an apartment to use it as an office. The office is located on a third floor at the Dr Hysern Street 22 in Banyoles.

The office is a continuous space with all necessary requirements to be used as an architectural studio. All services and stores are packed in the interior side in order to free the maximum working area surface. The partition walls are made of prefabricated plywood panels, assembled and fixed so it allows future changes in the interior distribution.
